*date of report*

### RESULTS:

Normal cardiovascular examination via auscultation - No evidence of congenital or acquired heart disease was noted. Since acquired heart disease may develop later, these evaluation results remain valid for one year, and annual examinations are recommended to continue to monitor cardiac health.

Registration: **DN74125602**  
Microchip: **900215006203998****Disorder Results (3 of 13)**

|      |             |                                                                                                                                                                    |
|------|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DM   | <b>n/DM</b> | Heterozygous: Dog carries one copy of the mutation associated with Degenerative Myelopathy. In some breeds, there is a low risk of the dog developing the disorder |
| EIC  | <b>n/n</b>  | Clear: Dog is negative for mutation associated with Exercise-Induced Collapse.                                                                                     |
| vWD1 | <b>n/n</b>  | Clear: Dog is negative for the mutation associated with von Willebrand's Disease Type I.                                                                           |

**Color Results (5 of 13)**

|                            |              |                                                                                                  |
|----------------------------|--------------|--------------------------------------------------------------------------------------------------|
| A-Locus                    | <b>aw/at</b> | Dog is wild-sable and carries the gene responsible for tan points.                               |
| B-Locus                    | <b>B/B</b>   | Dog does not carry the mutation for most forms of chocolate coloration.                          |
| D-Locus                    | <b>D/D</b>   | Negative: Dog is negative for the mutation associated with a diluted coat color.                 |
| E-Locus (E, EM, eA, eW, e) | <b>E/E</b>   | Dog is negative for cream/yellow, mask, and ancient red.                                         |
| K-Locus                    | <b>n/n</b>   | Dog is negative for the KB allele, and the coat coloration will be based on the agouti genotype. |

**Pattern Results (1 of 13)**

|         |            |                                                                               |
|---------|------------|-------------------------------------------------------------------------------|
| S-Locus | <b>n/n</b> | Negative: Dog is negative for the S-Locus. No white spotting will be present. |
|---------|------------|-------------------------------------------------------------------------------|

**Trait Results (4 of 13)**

|                   |              |                                                                                                                                                                    |
|-------------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Curl 1&2          | <b>n/n</b>   | The dog is negative for the hair curl allele. The dog will have non-curly hair, and will always pass on the allele responsible for non-curly hair to any offspring |
| Furnishings       | <b>n/n</b>   | Non-Furnished: Dog is negative for the furnishings mutation.                                                                                                       |
| Hair Length (1-5) | <b>L/L</b>   | Negative for long coat allele                                                                                                                                      |
| Shedding          | <b>SD/SD</b> | Dog has two copies of the shedding allele. The dog will have a higher propensity towards shedding.                                                                 |
